

DIRECTOR OF FACILITIES MANAGEMENT (ENGINEERING MAINTENANCE)

A large company based in Doha, Qatar requires a Director experienced in Facilities/Engineering Maintenance in a large company with multi-site operations.

Responsibilities will be predominantly (but not limited to) the running and modernization of a Planned Preventive Maintenance scheme, Plant Management and day-to-day maintenance of a very wide spectrum of facilities. This includes large-scale air-conditioning, power generation, normal utilities, and a wide variety of other equipment.

The candidate should have at least 5 years experience in a managerial role in a multi-site operation that is quality focused, and customer oriented. An engineering or facilities or maintenance background is required. A degree in an appropriate discipline such as Mechanical Engineering or Maintenance Engineering is much preferred though candidates with HND or Advanced Technical Diploma and the right experience will be accepted.

This experience could be in 5* Hotel Engineering, Large Prestigious Building Management, Maritime Engineering especially top-end Cruise Liners or Hospital Engineering.

The candidate will report to an Executive Director and/or Assistant Managing Director for Operations and will manage a team of senior and junior engineers and technicians.

The position will be very much in the public eye and will be internal and external customer focused.

The position will attract a package covering:-

A Salary between QR 20,000 and 27,000 per month.

Car Purchase Allowance

Furniture Allowance

Free Accommodation
